Specification

- Housing
 - Aluminum anodized, natural color **ALN**
 - anodized, black **ALS**
- Spirit level element
 - Glass plastic body
 - Filling colorless-transparent **K**
- Casting compound mineral-based
- RoHS compliant

On request

- Filling, green-transparent
- Other sensitivities
- Housing in brass or Stainless Steel

Information

Bull's eye levels GN 2278 are used to check the horizontal position of jigs, machines, devices, appliances and instruments.

The housing is grooved at its lower diameter d₃, making it easier to mount in place, e.g. by gluing.

The spirit levels are aligned in relation to the reference or contact surface, so that the bubble is located inside the marking ring once the horizontal position of the contact surface is reached.
