- Steel precision casting **ST**
zinc plated, plastic coated
black, RAL 9005, textured finish **SW**
- Elastomer element
- Perbunan® (NBR)
- temperature resistant up to 120 °C
- Hardness 85±5 Shore A
- *Elastomer characteristics* → Page 1483
- **RoHS compliant**

Information

In terms of their dimensions, rubber bumper stops GN 2374 have been designed as extras for the GN 237 and GN 337 family of hinges. They can also be bolt-attached when mounting the hinge, with an elastomer element limiting the angle of rotation to the value w .

They are mainly used for lighter traps and gates, or when the limit stop is not expected to be exposed to dynamic loads.
