**Information**

Twistable two-way clamp mountings GN 475 connect rods and tubes within the clamp mounting system under any adjustable angle. With the angle adjustment released, the clamp mounting halves stay connected with formlocking effect.

The standard version of the clamping screws at the clamping threads  $d_3$  and  $d_4$  are socket cap screws with hexagonal socket DIN 912. They can be replaced by a clamping kit GN 511 (article code see table of dimensions).
