Specification

3

Information

- Standard version —
Plastic
Technopolymer (Polyamide PA)
- glass fibre reinforced
- temperature resistant up to 130 °C
- black, matt finish
Bush, Stainless Steel AISI 303

○ CL

- Cleanline version
Plastic
Technopolymer (Polyamide PA)
- glass fibre reinforced
- temperature resistant up to 130 °C
- white, RAL 9002
Bush, Stainless Steel AISI 303

● CR

- Chrome-plated version
Plastic
Technopolymer (Polyamide PA)
- glass fibre reinforced
- temperature resistant up to 80 °C
- chrome-plated
Bush Brass

• Plastic characteristics → Page xx

• Stainless Steel characteristics → Page xx

• RoHS compliant

On request

- Bush Steel zinc plated, blue passivated

The underside of the knob GN 5337.4 is not recessed or hollowed. This means that if they are fitted with a Stainless Steel bush they will meet the standards and requirements for hygiene applications.

The chrome plating lends the star knobs a metallic appearance. The surface is hard and smooth. Features making these star knobs particularly suitable for applications where high hygiene standards are required.

If exposed to aggressive media, the chrome layer of the star knobs has an advantageous effect. Test series reports on the chemical resistance are available.

Star knob GN 5337.4-40-M8	1	d ₁
