Specification

- Body / catch / clamping lever / U-bolt latch
Stainless Steel AISI 304 forged
- Other parts
Stainless Steel AISI 303
- All moving parts
lubricated with special grease
- *Stainless Steel characteristics* → Page 1489
- **RoHS compliant**

3

Information

The GN 852.3 latch type toggle clamps are compact in design and can be used to ensure high holding capacities.

When closing the spanner, a safety hook positively locks onto the body. This prevents the inadvertent or vibration-induced release from the clamping position. To open the safety hook it is unlocked per one-hand operation.

The stroke of the U-bolt latch can be adjusted within its range.

In addition to the standard lengths for the U-bolt latch shown above, more lengths may be achieved by using series GN 951.1 square U-bolts
